detailed research on the un model convention's unique features the un model convention has a significant influence on international
 tax treaty practice and is especially used by emerging and developing countries as a starting point for treaty negotiations driven by the
 aim to achieve consistency in the international tax treaty practice the structure and content is to a large extent similar in the un model
 and the oecd model however whereas the oecd has historically focused its efforts on issues mainly relevant for developed countries the un
 tax committee has continuously attempted to specifically take into account tax treaty policies for developing countries when drafting
 and amending the un model convention compared to the oecd model convention the un model convention aims at giving more weight
 to the source principle popular examples are the pe definition in the un model which provides for a lower threshold than article 5 of the
 oecd model or article 12a on fees for technical services which has been introduced with the latest amendment of the un model
 convention 2017 and allows for a withholding tax to be levied on payments to non residents when the payer of the fee is a resident of
 that contracting state irrespective of where the services are provided interestingly in the discussions of the tax challenges arising from the
 digitalization of the economy the oecd and the g20 are also exploring options to allocate more taxing rights to the jurisdiction of the
 customer and/or user i.e. the market jurisdictions as this has traditionally been the focus of the un model convention its unique features
 and developing countries practices could be taken into account when exploring new nexus rules that are not constrained by the physical
 presence requirement this book contains the master's theses of the full time ll.m program 2018-2019 for which special features of the un
 model convention has been chosen as the general topic with this book the authors and editors do not aim at discussing each article of the
 un model convention but rather focus on the unique features of the un model convention which are explored in detail this is
 supplemented with an evaluation of the function and relevance of the un tax committee in the international tax policy discussion and
 with an analysis of the influences of the oecd's beps project on the un model the oecd's beps project on the un model

in 1877 the members of the united states senate postponed all business for the day so that they might attend a horse race the iconic
 polarizing post civil war event at the center of this story the nation still recovering from the depredations of the civil war and the
 reconstruction that followed recognized it as a north vs south encounter pitting new york's powerful thoroughbred tom ochiltree and
 new jersey's parole owned by the ostentatious northern tycoons pierre and george lorillard against the already legendary kentucky crack
 ten broeck owned by the teetotaling plain living frank harper and ridden by black jockey and former slave william walker representing
 a former slave state and its southern values the race and the colorful cast of characters involved reflected the still seething america
 during one of the nation's most difficult and divisive periods shrager presents a fascinating and heart pounding piece of history exposing

the racial and economic tensions following the civil war that culminated in one final race to the end
