this book constitutes the referred proceeding of the 1st international conference on engineering solutions toward sustainable development essd2023 organized by the faculty

of engineering port said university and held in port said egypt during may 2 3 2023 the book is devoted to fulfill the need for sustainable development that has never been more urgent it shows the crucial role of engineering to play in this transition from consumption culture to responsible culture this book explores the relationship between engineering and sustainability highlighting the vital role that engineering plays in achieving sustainable development the book provides a comprehensive guide for engineers researchers and experts from different disciplines that are interested in sustainable development from renewable energy sources to green infrastructure the book delves into the latest technological advancements providing insights and practical strategies for designing and implementing sustainable solutions with practical examples and case studies readers will gain a deep understanding of how engineering principles and practices can be harnessed to develop sustainable solutions that balance economic social and environmental needs and to mitigate the negative impacts of human activity on our planet the books is very useful for graduate students researchers policy planners decision makers and stakeholders in the field of renewable energy clean water development climate actions smart cities and communities and green infrastructures

artificial intelligence ai and machine learning ml are rapidly transforming how complex engineering and environmental challenges are addressed across disciplines these technologies offer advanced adaptive and efficient solutions for nonlinear problems in civil mechanical electrical and environmental engineering enabling more accurate modeling prediction and optimization the integration of these approaches reflects a growing interdisciplinary shift where digital intelligence supports both technological advancement and ecological responsibility as global priorities align toward innovation and sustainability leveraging ai across engineering fields has the potential to shape smarter societies ai based solutions for engineering explores the applications and novel solutions of engineering problems by using ai and its methodologies it realizes the solutions for different engineering problems with the contribution of ai technology covering topics such action classification edge devices and wastewater treatment this book is an excellent resource for developers engineers policymakers researchers academicians and more

triz is a brilliant toolkit for nurturing engineering creativity and innovation this accessible colourful and practical guide has been developed from problem solving workshops run by oxford creativity one of the world s top triz training organizations started by gadd in 1998 gadd has successfully introduced triz to many major organisations such as airbus sellafeld sites saint gobain dca doosan babcock kraft qinetiq trelleborg rolls royce and bae systems working on diverse major projects including next generation submarines chocolate packaging nuclear clean up sustainability and cost reduction engineering companies are increasingly recognising and acting upon the need to encourage successful practical and systematic innovation at every stage of the engineering process including product

development and design triz enables greater clarity of thought and taps into the creativity innate in all of us transforming random ineffective brainstorming into targeted audited creative sessions focussed on the problem at hand and unlocking the engineers knowledge and genius to identify all the relevant solutions for good design engineers and technical directors across all industries as well as students of engineering entrepreneurship and innovation triz for engineers will help unlock and realise the potential of triz the individual tools are straightforward the problem solving process is systematic and repeatable and the results will speak for themselves this highly innovative book satisfies the need for concise clearly presented information together with practical advice on triz and problem solving algorithms employs explanatory techniques processes and examples that have been used to train thousands of engineers to use triz successfully contains real relevant and recent case studies from major blue chip companies is illustrated throughout with specially commissioned full colour cartoons that illustrate the various concepts and techniques and bring the theory to life turns good engineers into great engineers
